

SHIELD TECHNOLOGIES
efficient welding solutions

TECHNICAL SPECIFICATIONS

PRODUCT NAME	SPATTER GUARD WELDING NOZZLE GEL
Product purpose:	Welding spatter release for protecting equipment
Product applications:	Protective film preventing adherence of weld spatter to nozzles and contact tips
Product features & benefits:	Reduced labour costs, improved contact tip and welding nozzle life
Instructions for use:	Dip warm nozzle into gel briefly ensuring all components are coated with a thin film.
Welding processes:	Gas metal arc welding, flux cored arc welding
Container size:	200g
Physical state:	Gel
Safety	Non hazardous
